Motorcraft® Extend

Coated Rotors

Quality parts for miles. And miles.

Motorcraft continues to deliver trusted, quality parts for Ford, Lincoln, and Mercury vehicles across their lifecycle. Motorcraft Extend expands that offering with value-driven solutions designed specifically for late lifecycle vehicle lines, helping keep vehicles on the road longer with confidence and at a price that fits their stage of life.

OE-Backed

Tested to meet Ford engineering standards and FMVSS safety requirements, no compromises, no guesswork so you get the fit, feel, and performance your customers expect every time.

Performance Without The Premium Price

The sweet spot between cost and reliability, competitively priced, consistently dependable. Motorcraft Extend coated rotors have high carbon casting. This significantly improves thermal capacity, helping the rotor dissipate heat faster and prevent warping or cracking under heavy loads or severe-duty driving.

- Ready to install out of the box
- Stylish and clean appearance for open wheel designs
- Mill-balanced for long term performance and vibration free stops
- GG15HC formulated high carbon casting for:
  - Enhanced heat dissipation and extended brake life
  - High resistance to thermal cracking and fade
  - Low noise propensity and resistance to brake judder

High Carbon casting
- *Corrosion resistance*
- *Low fade performance*

Built to Keep Your Business Moving

From daily drivers to high-mileage vehicles, Motorcraft Extend helps you deliver reliable brake repairs keeping Ford, Lincoln, and Mercury customers coming back to your shop.
